- P46-47 Stainless Steel Bolts & Nuts

# POSH FACTORY "JOY RIDE"

## Contained parts List

### [ Handle Area ]

1" bend pipe 80R [SS] #880150-50

Joint riser for welding on [SS] #880160

3" round mirror [modified] #880380

φ1 inch internal throttle kit [SS] #880371

Grip for φ1 inch internal throttle [S/A] #880371

Throttle cable for internal use [BK] #880275

11.5" front brake disk [concept model]

φ41 narrow glide triple tree [S/P] #882161

### [ Gas tank & Oil tank area ]

Petcock socket for welding on [SS] #880535

Oil tank [concept model]

### [ Peg & fender area ]

Stay collar for welding on [SS] #880100/880101

### [ Muffler area ]

φ45 120R bend pipe [SS]

φ45 55R bend pipe [SS]

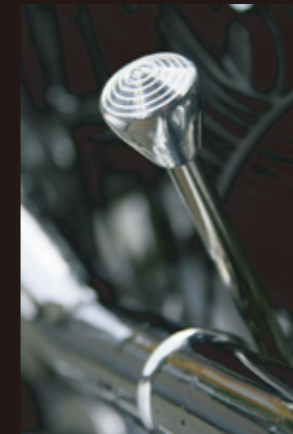

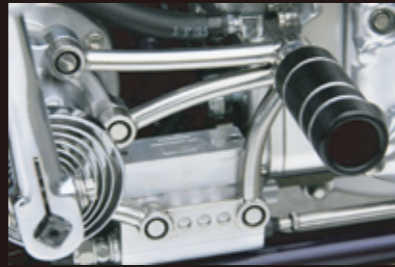

Spread pipe [φ45mm → φ50.8SS] #850052

### [ Transmission area ]

Adjustable transmission plate #882100

### [ Other ]

Adjustable Kickstand stop #880800

# φ 41 Narrow Triple

## φ 41 NARROW TRIPLE

- ◆ φ 41 narrow triple was finally put on the market spending long time and repeating making for trial purposes/test.
- It can be an installation of the disk brake of the reception desk and a bolt it on and by being able to narrow 59mm fork pitch compared with a wide glide of purity, and by building in parts of our specification.
- If it is 21 inches or 19-inch wheels, 11.5-inch disk rotors, and is an- adjustment of the production of the caliper support and the wheel collar etc. separately and the 41 narrow front fork reception after '49, it is possible to use it regardless of the age type.

φ 41 NARROW TRIPLE

OE Wide Glide

Picture1

Bolt it on required

- '00up Front Wheel Hub OEM43619-00/43610-00      21inch or 19inch Rims
- '00up Front Fork FXST OEM46004-00/46006-00 or FLT OEM46495-00/46497-00
- Performance Machine Inc. 4 Piston Calipers  
(Parts # 0053-2920-P or 0053-2920-CH or 0053-2920-B)

If you are installing the BT'36-'84 required Neck Cup Kit (Picture1)  
If you are installing the '88Up Softtail Frame Model required Internal Fork Stop

- ◆ It is related to the material, and triple upper and lower tree made by duralumin (A2017) and the axle shaft is made by chromium molybdenum steel(SCM435). It is stainless steels in the disk spacer and the collar. After right material in the right place necessity strength intimately is given by using stainless inch bolt made by DIAMOND.Eng(us) company for the installation bolt, corrosion resistance is designed considerably.
- ◆ finish also prepares three kinds standard(unprocessing beginning cutting down) and the show polish and polish black (anodized aluminum after polish)), it is possible to choose according to the favorite.

Part #	Finish	Axle Shaft	Sug.Retail
884160	Standerd	FXST	\$1,008.00
884161	Show Polish	FXST	\$1,050.00
884162	Polish Black	FXST	\$1,081.50
882160	Standerd	FLT	\$1,029.00
882161	Show Polish	FLT	\$1,071.00
882162	Polish Black	FLT	\$1,102.50

# φ 1 inch Internal Throttle Kit

Internal Throttle Kit is a throttle system to put wires through a pipe. This is the best item to make the appearance around the steering parts look sharp. Select the best one for you in consideration of the material and thickness of your handlebar.

### Characteristics

Duralumin 17S used for a slide barrel and WPC-MOS2 processing for the surface of the material reduce the slide friction. Also, the two made-in-Japan bearings in high quality in the slide barrel make very smooth control possible. The internal parts can be removed even while the kit is mounted, so wires can be easily removed or adjusted.

※WPC: A processing that can enhance the toughness and endurance of the material.

※MOS2: Molybdenum disulphide is inserted into the deeper part of a main material and re-crystallized. This processing enhances abrasion quality and reduces slide friction. Even when the main material is abraded away by friction, the layer of molybdenum disulphide spreads over the damaged spots and keeps its duration.

Part #	Handlebar Thickness	material	Sug.Retail
880370	1.6mm	Steel	\$299.25
880371	2.0mm	Steel	\$299.25
880375	1.5mm	Stainless Steel	\$325.50
880376	2.0mm	Stainless Steel	\$325.50

※ Regardless of a material of grips, this kit fits any grip for Harley-Davidson separated from a throttle corn.

### SLIDE BARREL ASSY

Duralumin 17S for the slide barrel and WPC and MOS2 processing for the surface of the material can curtail slide friction. Twominnature bearings with high accuracy and high performance actualize smooth control.

Stable stroke work is actualize even while running by inserting the inner sleeves into the handle bar and welding it directly to the handlebar

### KIT components

### TWIST SLEEVE ASSY

By using domestic ball bearing (removable, exchangeable) for the edge of inner sleeves and stabilizing it with bolts, smooth control without backlash in the radial and thrust direction is actualized.

You can remove the inner parts while attaching, so it makes easier for you to insert and adjust the wires after fixing the handlebars

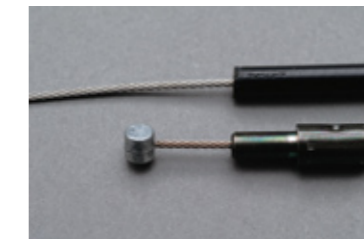

- ◆ Deassembling after attaching to the handlebar is very easy, because the wire catch is made in the consideration of wire attachment, exchange, and grip up.
- ◆ Enhancement of quality of all component and distinctive inventions for reducing side friction actualize smooth control.
- ◆ The handle bar used now is cut, welded, and installed in a specified size.
- ◆ most in complete parts is designed to suppress the generation of rust to influence operation and durability harmfully made of the stainless steel (SUS304), and to maintain it easily in addition, a long life has been achieved.
- ◆ All the repair parts are prepared, it is possible to use it forever.
- ◆ This kit is attachable to most of all kinds of throttle-corn separate type grips for Harley Davidson regardless of its materials.

## Wire for Internal Throttle

This throttle cable features an adjuster in the middle of cable. Cables in three lengths are available to fit various types of handlebars. Please select the best one for smooth control and sharp contour.

Part#	Outer Cable	Length	Sug.Retail
880275	Black Vinyl	1300mm	\$22.05
880276	Black Vinyl	1500mm	\$23.10
880277	Black Vinyl	1800mm	\$24.15
880265	Stainless Braided	1300mm	\$32.55
880266	Stainless Braided	1500mm	\$33.60
880267	Stainless Braided	1800mm	\$34.65

## Billet Grip for Internal Throttle

Grips are machined from billet aluminum. Knurling grips and Jack Hammer type grips in silver and black are available. This is must for riders who favor future-oriented custom building.

Part#	Type	Color	Sug.Retail
880300-SA	Knurling	Silver	\$155.40
880300-BA	Knurling	Black	\$155.40
880301-SA	Jack Hammer Type	Silver	\$207.90
880301-BA	Jack Hammer Type	Black	\$207.90

## φ 1 inch Internal Throttle Kit for LINKERT

Internal Throttle Kit is a throttle system to **push** wires through a pipe. This is the best item to make the appearance around the steering parts look sharp. Select the best one for you in consideration of the material and thickness of your handlebar.

### ■Characteristics

Duralumin 17S used for a slide barrel and WPC-MOS2 processing for the surface of the material reduce the slide friction. Also, the two made-in-Japan bearings in high quality in the slide barrel make very smooth control possible. The internal parts can be removed even while the kit is mounted, so wires can be easily removed or adjusted.

※WPC: A processing that can enhance the toughness and endurance of the material.

※MOS2: Molybdenum disulphide is inserted into the deeper part of a main material and re-crystallized. This processing enhances abrasion quality and reduces slide friction. Even when the main material is abraded away by friction, the layer of molybdenum disulphide spreads over the damaged spots and keeps its duration.

Part #	Handlebar Thickness	material	Sug.Retail
880360	1.6mm	Steel	\$299.25
880361	2.0mm	Steel	\$299.25
880365	1.5mm	Stainless Steel	\$325.50
880366	2.0mm	Stainless Steel	\$325.50

※ Regardless of a material of grips, this kit fits any grip for Harley-Davidson separated from a throttle corn.

## φ 7/8 inch Internal Throttle Kit

### ■Characteristics

Duralumin 17S used for a slide barrel and WPC-MOS2 processing for the surface of the material reduce the slide friction. Also, the two made-in-Japan bearings in high quality in the slide barrel make very smooth control possible. The internal parts can be removed even while the kit is mounted, so wires can be easily removed or adjusted.

※WPC: A processing that can enhance the toughness and endurance of the material.

※MOS2: Molybdenum disulphide is inserted into the deeper part of a main material and re-crystallized. This processing enhances abrasion quality and reduces slide friction. Even when the main material is abraded away by friction, the layer of molybdenum disulphide spreads over the damaged spots and keeps its duration.

Part #	Handlebar Thickness	material	Sug.Retail
642370	1.6mm	Steel	\$299.25
642371	2.0mm	Steel	\$299.25
642375	1.5mm	Stainless Steel	\$299.95
642376	2.0mm	Stainless Steel	\$299.95

※ Regardless of a material of grips, this kit fits any grip for Harley-Davidson separated from a throttle corn.

## Wire for Internal Throttle Kit to use LINKERT

Part#	Outer Cable	Length	Sug.Retail
880286	Black Vinyl	1500mm	\$29.40

MADE IN JAPAN

## Wire's for Internal Throttle Kit

Type1 Mainly for YAMAHA

Type2 Mainly for YAMAHA

Type3 Mainly for YAMAHA

Type4 Mainly for KAWASAKI

MADE IN JAPAN

Adjuster

The installationthe following play adjustment and maintenance are done easily and it is very convenient because it is addition of the adjuster for the adjustment of the inner wire. Moreover, you can choose from 4 kinds of metal fittingsin the carburetor installation part are preparatory by the installed model (carburetor), and confirm the carburetor installation part of the wire used now. It is strong, and strong in rust in making the inner wire made of the stainless steel. Black vinyl court finish and 1500mm in lengthof wire is available.

Part#	Type	Length	Sug.Retail
840276	Type1	1500mm	\$22.05
841276	Type2	1500mm	\$22.05
842276	Type3	1500mm	\$22.05
651276	Type4	1500mm	\$22.05

## "POSH Internal throttle kit"

Smooth operation and made of maintenance excellent, to decrease the sliding resistance as it is thoroughly as the WPC+MOS processing is given to the slide parts by using three highly accurate ball bearings for the rotation axis this time, a special design is done as well as a past kit. Moreover, it is a stainless steel almost in complete parts Generation is suppressed and the length life of rust also that is the cause of operation and durability in (SUS304) has been achieved.Please choose the inner sleeve that is welded and installed in thehandle bar according to the material and the thickness of the pipe.

(\* The processing to the inner sleeve might become necessary by the allowance of the pipe material of the handle bar.)

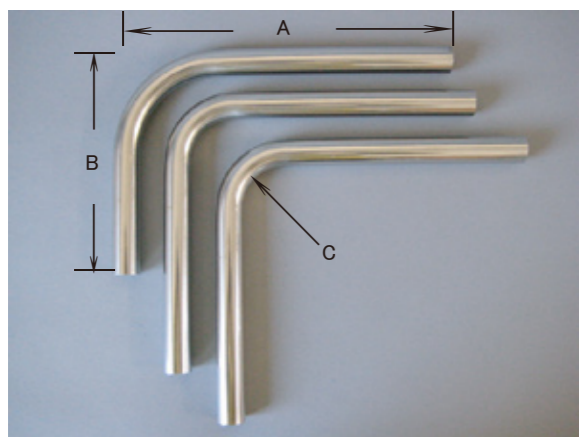

# Welding On Parts

## Bent Pipe 1.0-inch/90°

Bent pipes the same in size as handlebars. Please make your own handlebar by putting other items such as Short Riser for Welding On together.

Part #	material	Measurement	U/M	Sug.Retail
880150-50	Steel	A:270mm/B:240mm/C:50R	PR	\$50.40
880151-50	Stainless Steel	A:270mm/B:240mm/C:50R	PR	\$60.90
880150-65	Steel	A:285mm/B:285mm/C:65R	PR	\$50.40
880151-65	Stainless Steel	A:285mm/B:285mm/C:65R	PR	\$60.90
880150-80	Steel	A:300mm/B:190mm/C:80R	PR	\$50.40
880151-80	Stainless Steel	A:300mm/B:190mm/C:80R	PR	\$60.90

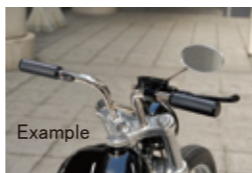

## Joint Riser for Welding On

These joint risers used for attaching handles directly to the top bridge are irreplaceable in customization today. The lineup features both steel and stainless steel types. Cut the handlebars to the desired length, insert the 20mm part into the pipe, and weld to use.

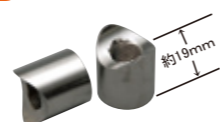

Part #	material	U/M	Sug.Retail
880160	Steel	PR	\$50.40
880161	Stainless Steel	PR	\$71.40

## Short Riser for Welding On

The lowest riser in our existing products created for customers who want curtail the height as much as possible. The height needed for mounting is 19mm. Please weld it on the handlebar.

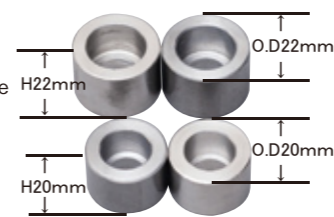

Part #	material	U/M	Sug.Retail
880165	Steel	PR	\$50.40
880166	Stainless Steel	PR	\$71.40

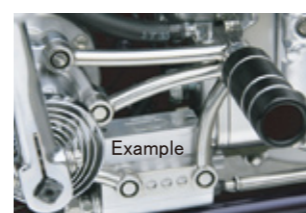

## Stay Collar for Welding On

These weld-on stay collars are just right for situations such as sissy bar and stay manufacturing. Their diameter lets them accommodate cap bolts. They can handle 3/8-inch and 5/16-inch bolts. And the lineup features both steel and stainless steel types. Great for a variety of processing uses such as one-off part manufacturing.

Part # (Size3/8)	Part # (Size5/16)	material	U/M	Sug.Retail
880100	880102	Steel	2pcs	\$10.50
880100-10	880102-10	Steel	10pcs	\$42.00
880101	880103	Stainless Steel	2pcs	\$16.80
880101-10	880103-10	Stainless Steel	10pcs	\$71.40

## Mount Tab Steel for Welding On

These weld-on mount tables are helpful for situations such as attaching a sissy bar to the frame or changing the rear step position. With 6mm tab thickness and 8mm hose diameter, they are resistant to warping when welding, strong, and adaptable to various situations such as modifying the hole diameter. Made of steel.

Part #	material	U/M	Sug.Retail
880104	Steel	2pcs	\$16.80
880104-10	Steel	10pcs	\$71.40

## Base for Jockey Shift Bracket

The original base plate convenient for mounting a jockey shift to a ratchet top mission. It is made of stainless steel and is 5mm wide so it is resistant to distortion by welding and suitable for various kinds of modification.

Part #	material	U/M	Sug.Retail
880130	Steel	Each	\$25.20
880131	Stainless Steel	Each	\$29.40
880130-5	Steel	5pcs	\$94.50
880131-5	Stainless Steel	5pcs	\$110.00

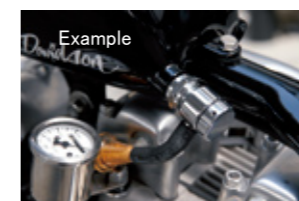

## Petcock Socket for Welding On

Sockets for  $\phi 22$ mm fuel cocks. Very useful for creating and modifying a tank. You can change the position of a fuel cock with this, then flexibility for custom-building increases. Please make a hole on the tank and weld it on.

Part #	material	U/M	Sug.Retail
880535	Steel	Each	\$39.90
880535-5	Steel	5pcs	\$159.60

※ We do not sell fuel cocks.  
 ● Whole length 57mm (including 7mm for screws)  
 ● Outer diameter 25mm X Inner diameter 20mm

## Oil Line Fitting & Mounting Collar for Oil Tank

Fittings for oil line to create your own oil tank. Please weld it in consideration of the shape of the tank and the position of hoses.

Part #	material	U/M	Sug.Retail
880520	Steel	Each	\$9.45
880521	Stainless Steel	Each	\$12.60
880520-8	Steel	8pcs	\$56.7
880521-8	Stainless Steel	8pcs	\$75.6

● Length 10mm ● Outer Diameter 20mm ● Screw Pitch 1/8-27

As well as Oil Line Fitting, this mounting collar for a tank should be used when making your own oil tank. Please weld it on in consideration of the welding position of the tank.

Part #	material	U/M	Sug.Retail
880510	Steel	Each	\$12.60
880511	Stainless Steel	Each	\$16.80
880510-6	Steel	6pcs	\$56.7
880511-6	Stainless Steel	6pcs	\$75.6

● Length 20mm ● Outer Diameter 25mm ● Screw Pitch 5/16-18

● Example 1inch Bent Pipe 65R +Joint Riser

● Example 1inch Bent Pipe 50R +Joint Riser

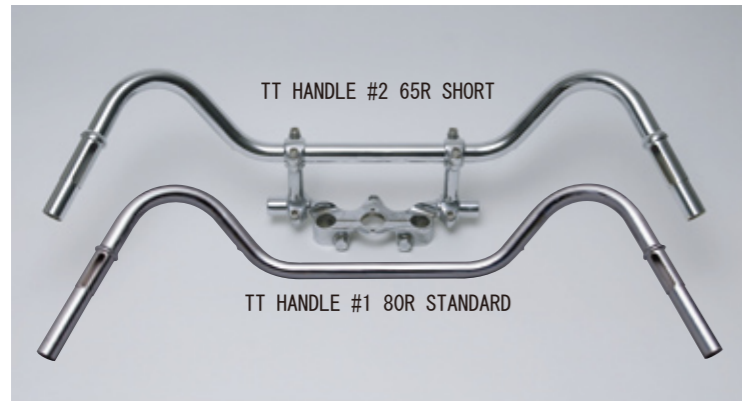

# TT Handle & Plug Wiwe

## TT-type Handlebar

This is a reproduction of so-called "Flanders" type handlebars loved by '50s riders. It features the beauty of largely curved shape. The riders used to position it much lower than other types of handlebars for their fashion. We produce handlebars in house to control the production strictly. Also, we separate handlebars into two main parts, a pipe and grips, and braze them. In this way, we enhance the beauty and quality of handlebars.

Part #	Type	U/M	Width	Rise	Pullback	Sug.Retail
882150	#1 Standard	Each	835	105	187	\$441.00
882155	#1 Short	Each	805	105	152	\$441.00
882156	#2 Short	Each	750	90	140	\$441.00

**[Part numbers corresponding to throttle parts]**

Handlebar end nut	56287-36
Handlebar spiral	56245-35
Plunger	3316-31
Throttle Pin	9281
Roller block	56281-31
Collar	56278-10

A throttle part fits 1936-48 "Big Twin" genuine parts. For a shorter type, a handlebar spiral has to be shortened.

**MADE IN JAPAN**

OEM 56502-32

**MADE IN JAPAN**

## Cotton Braided Ignition Wire

It is the cotton braided plug wire of a classical taste. It combines IG connector and a plug cap sold separately, and uses it. The IG connector recommends the purchase after confirmed the existing motorcycle.

Part #	Length	U/M	Sug.Retail
880600	1m	Each	\$10.50
880600-10	10m	Each	\$52.50

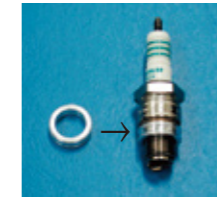

● Example installation

## Spark-plug Conversion ADAPTER

A thermal value for a BPR-HS plug is 8, but BR-ES plug gets usable by using this adaptor. Duralumin machined-body and the width is 6.5mm. You just attach it to a joint to a BR-ES plug.

Part #	U/M	Sug.Retail
490010	Each	\$5.25

## Terminal Nut

To use Taylor silicon cord, a terminal nut has to be put on a plug head. If your plug does not have a terminal nut, this terminal nut is necessary.

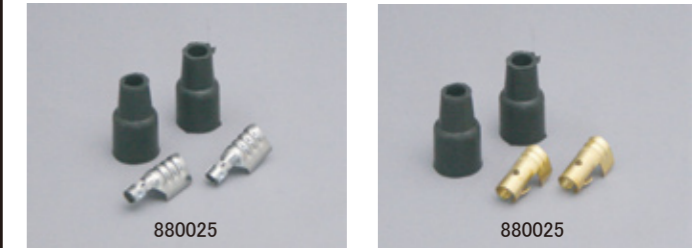

Part #	U/M	Sug.Retail
800024	Each	\$3.15

## Ignition Wire Connector for Harley Davidson

To attach a Taylor silicon cord to an ignition coil of Harley-Davidson, this connector is necessary.

Corresponding Motorcycle	Part #	U/M	Sug.Retail

# MINI-SWITCH for 1-inch. Handlebar

Assemblies of a tiny switch for turn signal and horn. Along with an internal throttle kit, it makes the appearance around steering device look sharp. Four types of housing, two types of toggles, manual / automatic switches (using spring return) for turn signal lights are available.

■Characteristic: The housing is very tiny in 41mm by 18mm.

Black Coated Lever (Toggle Switch)

Flat Bar Lever (Toggle Switch)

The most basic type machined from billet aluminum.

Bottom of this product. It may be required to put a part of the switch unit into the inside of a handle pipe.

Matches classical-looking custom building.

Two different looks for both manual and automatic type.

Part #	Toggle	Cancel	Housing	Sug.Retail
880210	Black Coated	Manual	Chrone Plating	\$50.40
880211	Black Coated	Manual	Aluminum Cut Out	\$50.40
880212	Black Coated	Manual	Brass Cut out	\$50.40
880213	Black Coated	Manual	Black Anodized	\$50.40
880214	Black Coated	Manual	Black Winkle Paint	\$50.40
880220	Black Coated	Auto	Chrone Plating	\$50.40
880221	Black Coated	Auto	Aluminum Cut Out	\$50.40
880222	Black Coated	Auto	Brass Cut out	\$50.40
880223	Black Coated	Auto	Black Anodized	\$50.40
880224	Black Coated	Auto	Black Winkle Paint	\$50.40
880230	Flat Bar	Manual	Chrone Plating	\$50.40
880231	Flat Bar	Manual	Aluminum Cut Out	\$50.40
880232	Flat Bar	Manual	Brass Cut out	\$50.40
880233	Flat Bar	Manual	Black Anodized	\$50.40
880234	Flat Bar	Manual	Black Winkle Paint	\$50.40
880240	Flat Bar	Auto	Chrone Plating	\$50.40
880241	Flat Bar	Auto	Aluminum Cut Out	\$50.40
880242	Flat Bar	Auto	Brass Cut out	\$50.40
880243	Flat Bar	Auto	Black Anodized	\$50.40
880244	Flat Bar	Auto	Black Winkle Paint	\$50.40

※ Automatic-cancel is not electrical function, but it works by releasing fingers from the toggle.  
 ※ Only one type for homing button (push button) is available.

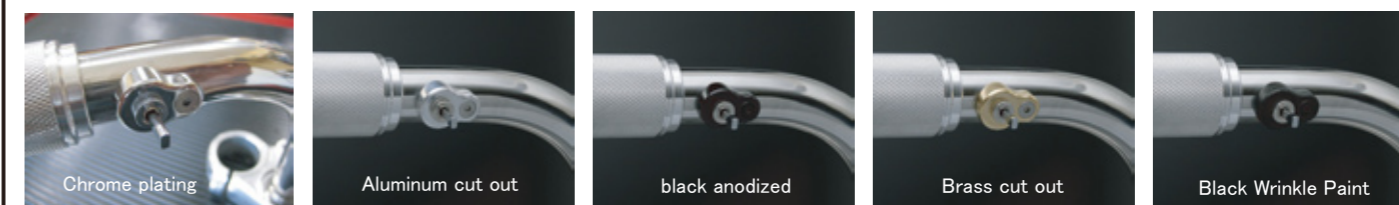

# 1 Hole MINI SWITCH for 1-inch. Handlebar

The switch bracket considers the size with other combination parts such as the Brake & clutch levers. It is designed to become small as much as possible, and the custom around a simple handle bar. One hall type of the mini switch with a lot of demands.

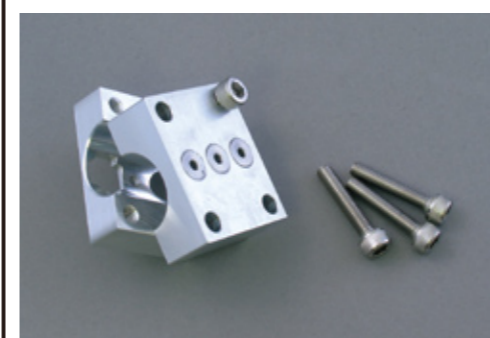

For Turn Signal or horn for 1 inch handle bar.

It produces it with beginning cut everything down, and the switch bracket is finish and a switch of the switch bracket.

■Characteristic: The housing is very tiny in 28mm by 19mm. No switch smaller than this is available

## Drilling JIG BLOCK for 1-inch MINI-SWITCH

Drill jig for mini-switch. It drills a pilot hole 3mm diameter for M4 fixing screws of a switch housing. The half side of this block can put marking-off for a toggle switch and a push button switch. The width of this block is 41mm and the same as the width of the switch housing. So, you can drill holes while checking the mounting location.

Part #	Size	Sug.Retail
880206	50 x 41mm	\$ 78.75

Part #	Toggle	Cancel	Housing	Sug.Retail
880330	Flat Bar	Manual	Chrone Plating	\$39.90
880331	Flat Bar	Manual	Aluminum Cut Out	\$39.90
880332	Flat Bar	Manual	Brass Cut out	\$39.90
880333	Flat Bar	Manual	Black Anodized	\$39.90
880334	Flat Bar	Manual	Black Winkle Paint	\$39.90
880340	Flat Bar	Auto	Chrone Plating	\$39.90
880341	Flat Bar	Auto	Aluminum Cut Out	\$39.90
880342	Flat Bar	Auto	Brass Cut out	\$39.90
880343	Flat Bar	Auto	Black Anodized	\$39.90
880344	Flat Bar	Auto	Black Winkle Paint	\$39.90

Part #	Switch	Housing	Sug.Retail
880350	Push	Chrone Plating	\$39.90
880351	Push	Aluminum Cut Out	\$39.90
880352	Push	Brass Cut out	\$39.90
880353	Push	Black Anodized	\$39.90
880354	Push	Black Winkle Paint	\$39.90

※ Automatic-cancel is not electrical function, but it works by releasing fingers from the toggle.  
 ※ Only one type for homing button (push button) is available.

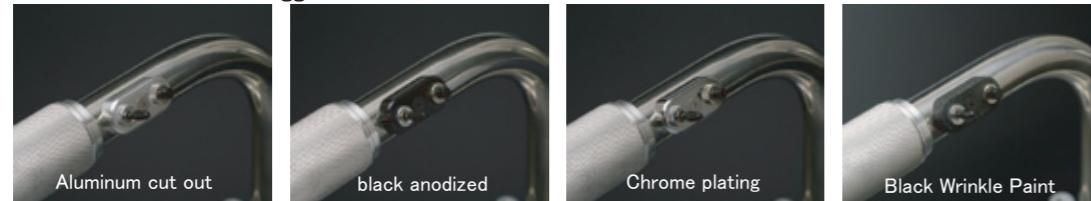

# MINI-SWITCH for 7/8-inch Handlebar

Assemblies of a tiny switch for turn signal and horn. Along with an internal throttle kit, it makes the appearance around steering device look sharp. Four types of housing, two types of toggles, manual / automatic switches (using spring return) for turn signal lights are available.

■Characteristic: The housing is very tiny in 41mm by 18mm.

Black Coated Lever (Toggle Switch)

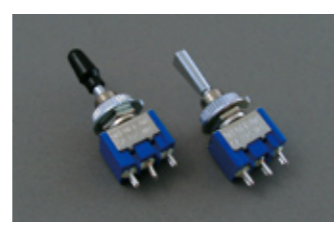

Flat Bar Lever (Toggle Switch)

The most basic type machined from billet aluminum.

Bottom of this product. It may be required to put a part of the switch unit into the inside of a handle pipe.

Toggle Switches

# 1 Hole MINI SWITCH for 7/8-inch Handlebar

The switch bracket considers the size with other combination parts such as the Brake & clutch levers. It is designed to become small as much as possible, and the custom around a simple handle bar. One hall type of the mini switch with a lot of demands.

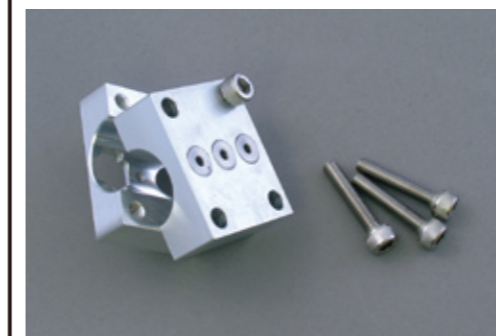

For Turn Signal or horn for 1 inch handle bar.

It produces it with beginning cut everything down, and the switch bracket is finish and a switch of the switch bracket.

■Characteristic: The housing is very tiny in 28mm by 19mm. No switch smaller than this is available

## Drilling JIG BLOCK for 7/8-inch MINI-SWITCH

Drill jig for mini-switch. It drills a pilot hole 3mm diameter for M4 fixing screws of a switch housing. The half side of this block can put marking-off for a toggle switch and a push button switch. The width of this block is 41mm and the same as the width of the switch housing. So, you can drill holes while checking the mounting location.

## Adjustable Plate for Transmission Case

A supporting plate for the transmission case corresponding to 4-speed transmission bike frames. Aluminum 7075 known as a material for aircrafts is used for this product. Each component created with highly accurate measurement makes precise adjustment possible. Highly recommended for the belt drive system.

※Some adjustments to the transmission case as well as hole-drilling are needed when attaching it to frames from '36 to '57 model.

※Only the transmission case has to be adjusted for the frames from '58 to '69 model.

Part #	material	U/M	Sug.Retail

# Bent Pipes for Exhaust Pipes

Bent pipes are a very useful material for creating your own muffler. Stainless steel pipes and steel pipes are available, and each has 3 different levels of inner diameters and 19 levels of angle. High circularity free of unnatural distortion and steps are achieved. You will be satisfied with the quality of our bent pipes as a material for your custom building.

Stainless steel pipes

Steel pipes

Front:φ45×160°/20°/40°/60°  
Rear:φ45×60°/40°/60°

▶ Example of use of bent pipes  
Type: DYNA  
The bent pipes used in this example  
Front:φ50.8×30°/80°/30°/30°  
Rear:φ45×80°/140°

Bent pipes being welded on an exhaust pipe

Three dimensional pipe bender enables us to create bent pipes in much higher quality. We consider careful management of the production line as a crucial factor, so all bent pipes are manufactured in our own factory.

MADE IN JAPAN

## Order system for bent pipes

You can specify the length and angles.  
You need to ask a separate quote, so please feel free to inquire.  
★Three sizes of inner diameter in 38.1, 45, and 50.8 are available.  
You can not specify the radius of pipes.  
★Please refer to p.21 about inquiries.

## List of Bent Pipes

This page items are  MADE IN JAPAN

Lengths are approx.15mm longer on straight part. Pipe Thick Steel=1.6mm / Stainless Steel =1.5mm

# Muffler Componentry

## Joint Pipe for "Pan Head"

In the case of the muffler production of the pan head, it is a joint pipe to use. When the band for fixation is tightened by putting the slit in the insertion part to the head by four places, it becomes familiar well, and an excessive tightening torque is not needed for the installation like the two-place slit. It is firmly installed by assuming the depth of the slit to be 15mm and using it together with our stainless exhaust band (product number 800663).  
\* Please choose from stainless steel/steel according to the material of the muffler.  
\* Might of shut when the installed head is thin.  
\* Please note the tightening torque when you install it.

Example installation

Steel Stainless Steel

## Muffler Bracket for Welding On

There is free position degree when stay is installed by making the stay installation part a slide type, and very convenient to make a muffler stay. The bracket is used in the muffler, and after it welds, and the stud bolt is adjusted to arbitrary length, it welds and it uses for the square nut as T bolt.  
\* Please choose from stainless steel/steel according to the material of the muffler.

# Turn Signal Light

## Machined Billet Aluminum Model

Turn signal lights machined from billet aluminum have been very popular in every motorcycle show, and they finally come up as our product lineup. A unique luster of aluminum adds a premium and matured accent. Anodized silver and black for colors and ten types of lenses are available, and they will match various kinds of motorcycle custom building.

[The title for each product signifies the differences in shapes of lenses]

Screws in mounting hardware are M8

## Prism Shaped Model

The concept for this model is psychedelic, and the design is modest in size and sharp. ADC6, which is often used for marine vessel, is the main material for this model. ADC6 contains much magnesium and is corrosive resistant and burst-proof. The mounting hardware such as washers and nuts are, not to mention, all made of stainless steel. Your satisfaction with high quality of POSH products is guaranteed.

※ Repair Parts such as lenses and O-rings are available.
